

Providing Premium Banking IT Services

SOFGEN, a Tech Mahindra company, delivers IT solutions, to some of the world's most prestigious banks and financial institutions. Our services cover the entire system life cycle, from requirements analysis and system selection, to implementation and ongoing post implementation support.

Expertise in & around core banking

SOFGEN offers end-to-end banking IT services, both in and around core systems, ranging from requirements analysis and system selection to implementation and beyond. Our offering encompasses solutions to the most critical challenges facing banks today.

Broad spectrum experience

Our clients are financial institutions from large, to small. They undertake a wide variety of banking activities including private, retail, corporate, investment and microfinance banks as well as wealth managers.

A global IT consultancy

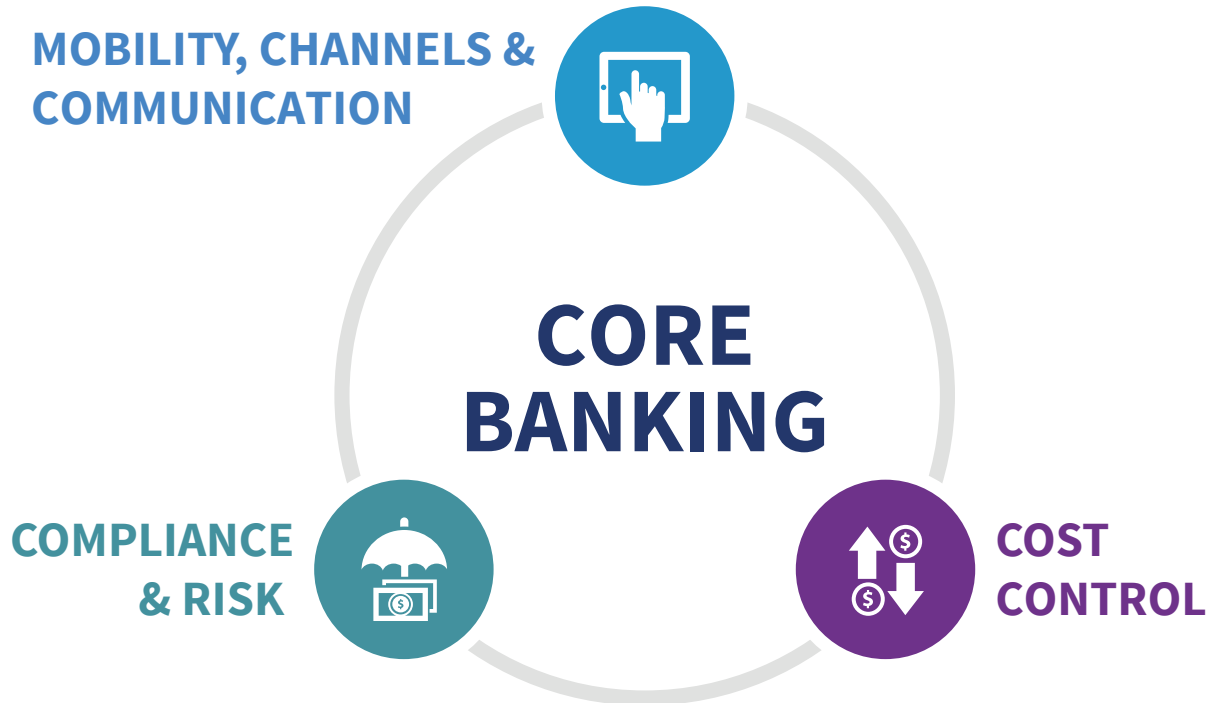

Our team operates from 20 offices on 5 continents. We recruit, develop and retain the most talented and experienced project managers, business analysts, consultants and engineers in the industry. We employ industry pioneers and architects; some of the best minds in banking IT work at **SOFGEN**.

A track record of success

Our staff are consistently scored by our clients as the most experienced, the most capable and the most dedicated. Our 430 consultants have an average of over 7 years' experience.

150+ Clients currently served

Offering a complete range of services to clients over the system lifecycle, **SOFGEN** has the highest customer satisfaction levels. Our staff are consistently scored by our clients as the most experienced, the most capable and the most dedicated.

We have a strong record in delivering **system implementation** projects. Our delivery experience is most relevant, together with the attitude and motivation of our consultants. **SOFGEN** offers **post-implementation** and **operations-support**, ideally as a managed service via our ten level modular support model.

Over time, requirements change and day to day run the bank type enhancements may no longer suffice to satisfy the business. **SOFGEN** is frequently requested to provide **system audit** activities. The system audit report typically covers current system status, along with recommended system, organisational and technical improvements required to realign to the bank's evolving requirements.

We provide **offshore development** services from our Tier 1 bank- audited development centres in Chennai, India and Manila, Philippines. In order to increase productivity and reduce operating expenses by leveraging offshore talent, **SOFGEN** offers flexible engagement models, in particular fixed price and solution work, which with attendant risk-sharing provides better value to our clients.

Our **solution development** services cover the full Software Development Lifecycle. We are current on the most up-to-date technologies and platforms, and our project experience spans relevant methodologies such as Waterfall, Prototyping and Agile.
