

Providing Premium Core Banking Suites, Products & Technology

SOFGEN, a Tech Mahindra company, delivers IT solutions in and around core banking to some of the world's most prestigious banks and financial institutions. Our services cover the entire system life cycle, from requirements analysis and system selection, to implementation and ongoing post implementation support.

Everything you need, in and around core banking

In IT terms, banking evolution means more than just paperless statements. In today's marketplace, it means dealing with highly mobile customers who demand streamlined communications and interaction via multiple channels.

It means managing compliance and risk in an ever more challenging regulatory environment. And as if that were not enough, IT departments are under pressure to control costs as increased competition and regulation drive down margins, putting further pressure on budgets.

At SOFGEN, we specialize in architecting and implementing the IT systems you need in order to face the challenges of today and tomorrow. Whether in or around core banking, we deliver end-to-end solutions that fit your requirements.
